

mxfSPEEDRAIL Xpress 2U

All services wrapped in a 2RU platform!

ONLY
24 CM
DEPTH

• Fully unified capture and storage system

• No need for extra equipment

• Modular architecture

• Compact solution - only 24 cm deep

• Integrated storage in the same unit

The mxfSPEEDRAIL Xpress 2U adds **storage** capabilities and **up to 4 simultaneous SDI channels** into a fully featured toolset that includes **ingest, capture, playback, file conversion** and **transcoding** services featured on a single and configurable platform with only 24 cm deep.

By integrating shared storage (up to 16TB) and local storage (up to 8TB) mxfSPEEDRAIL Xpress 2U reduces the time to access the contents and enables a full collaborative environment among editorial team and creative professionals from the moment of acquisition into its distribution and archiving.

With the same affordable and compact unit, users are able to cover all their production needs, managing different formats and standards and different solutions, from different vendors, while storing and keeping track of all assets.

THE ULTIMATE LEVEL OF FLEXIBILITY FOR YOUR PRODUCTION ENVIRONMENT!
