## The smarter way to manage Avid edit storage

**PARKING:** a range of products that simplify and automate the management, backup & archive of Avid storage and projects

Broadcasters are typically wasting up to 20% of their shared storage capacities simply due to duplicate files or orphaned media.

With the ever increasing demand to use more media there is a growing need for organisations to optimise shared storage resources.

Our range of PARKING solutions provide an Avid project and workspace aware toolset to analyse, manage and optimise shared storage. PARKING understands the relationship between projects, bins, their media and the workspaces they are stored in.

PARKING speeds up the regular shared storage administration process enabling personnel to focus on other critical and revenue generating tasks.

**PARKING offers a smarter way to manage your Avid storage, Avid projects and Avid workspaces**

**"PARKING saves us time as the process is automated. The reports and statistics we get enable the de-duplicating of material which frees up storage space too."**

Eoin Brennan, post production supervisor, TV3 Group, Eire

### AVID STORAGE ANALYSIS

- Summary of all of your Avid storage
- Instant visual view of storage efficiency
- Critical statistics at a glance
- Identify the last known location of off-line files
- Identify and delete orphan and duplicate files
- Track changes in use over time
- Export storage analysis data for use in Excel

### AVID PROJECT MANAGEMENT

- Tracks projects and workspaces over time
- Select projects or workspaces to study their contents
- Count total files in projects or workspaces
- Group projects together to see total usage
- Archive, transfer or delete entire projects and their media
- Restore projects or only a selection of the bins
- API integration with 3rd party archive storage systems

### PARKING SOLUTIONS

- Archive system API integration
- Archive Projects
- Gather project media together
- Disaster Recovery

- Find & Remove Duplicate Media
- Find & Remove Orphan Media
- Free up Edit Storage
- Off-Line Workflows

- Project and media deletion
- Take Projects Offsite
- Use 3rd Party Storage
- Move projects off-site
