moves media

Fire, flood, theft or simple human error!

**Is your Avid storage protected from disaster?
Can you restore your most critical Avid projects
in just a matter of minutes?**

WORKSPACE PARKING provides a Disaster Recovery solution for Avid workspaces

Create a backup on tier 2 storage of entire workspaces.

Backup includes all projects referencing media on the workspace and any additional media used and can be regularly updated with new versions of the projects and any additional media. Media is not duplicated, no matter how many projects refer to it.

Backups can be restored by Workspace, Project or Bin along with referenced media.

Retention policy controls how long files remain in backup after deletion from the shared storage.

All tasks are scheduled and executed in the background.

NEW: With WORKSPACE PARKING SYNC you can keep two Avid workspaces synchronised.

**WORKSPACE PARKING provides 'set and forget'
business continuity assurance for Broadcasters**

WORKSPACE PARKING

Disaster Recovery for Avid Storage

“WORKSPACE PARKING backs-up and restores our three ISIS/Interplay systems with 350 Media Composers connected and a total capacity of around 600 TB”

Gert Hansen, team leader R&D Media Systems, Danish Broadcasting Corporation

HOW IT WORKS

WORKSPACE PARKING creates a backup of your workspaces, identifying which projects reference what media and adds these projects to the backup, along with any additional media those projects require. It can be set to run at specific times and stores the backup in a simple open folder structure. A retention policy controls how long items are held in the backup after the original has been deleted from the workspace.

Restore any version of a project, individual bins or the entire workspace.

NEW FEATURES

WORKSPACE PARKING SERVER is a server based version which enables access and monitoring via easy to navigate web pages.

WORKSPACE PARKING SYNC makes an exact copy of all content on one workspace on another keeping the destination workspace in sync with the source.
