MIST ON-SET / NEAR-SET RAW DAILIES QC & MANAGEMENT

real-time RAW debayering with Mosaic engine
 real-time primary color grading
 real-time rendering with Jazz engine

Native read and real-time de-Bayering of RAW footage including ARRIRAW, Phantom Cine files, Adobe CinemaDNG

Real-time playback of the RAW data up to 5K (RED Epic with REDRocket™)

Back-ups and data integrity controls

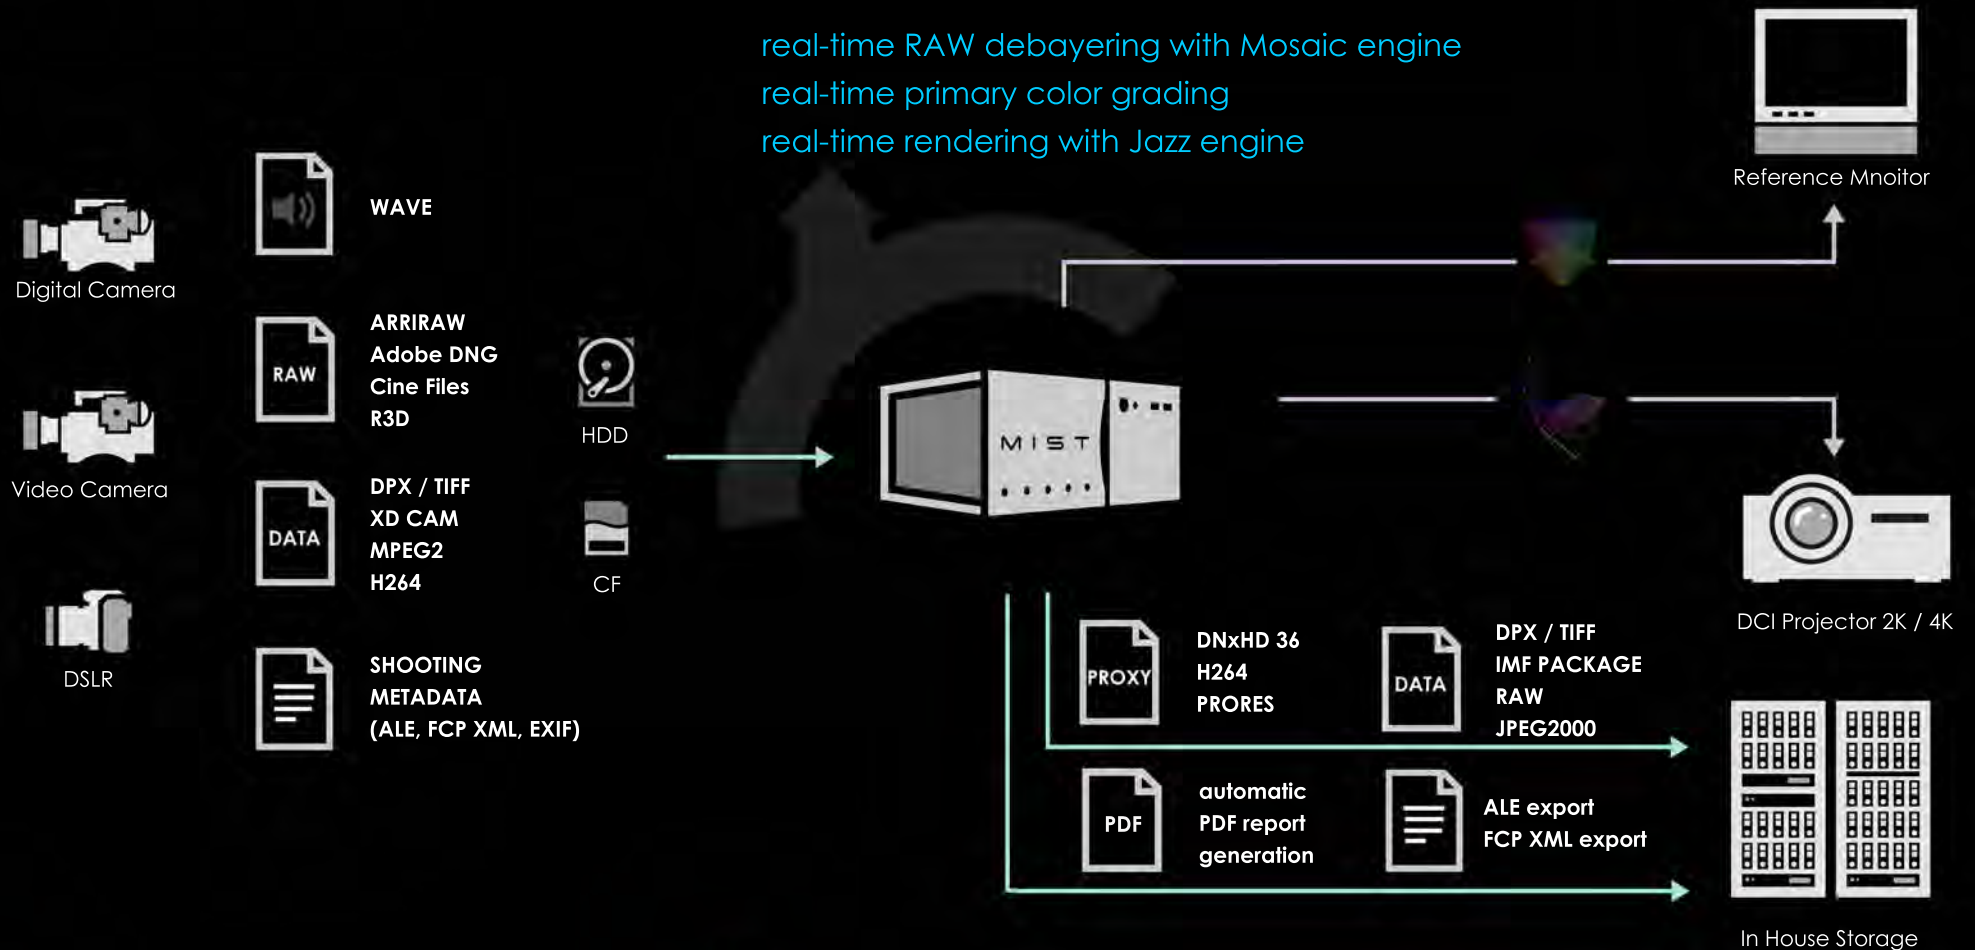

Real-time primary grading and RAW parameters adjustment in the same color pipe-line

Support of custom 3D LUT for monitoring

Batch rendering capabilities for the proxy versions (H264, ProRes, DNxHD...) for editing and reviewing

→ 3G SDI SD/HD
 → Ethernet / Fiber Channel, USB

real-time RAW debayering with Mosaic engine
 real-time primary color grading
 real-time rendering with Jazz engine

Native support of all data formats & playback in real-time

Ability to mix file formats and resolution in the same timeline

Auto-synchronization of audio tracks with the image layer

Login & Comments per clip handled as metadata

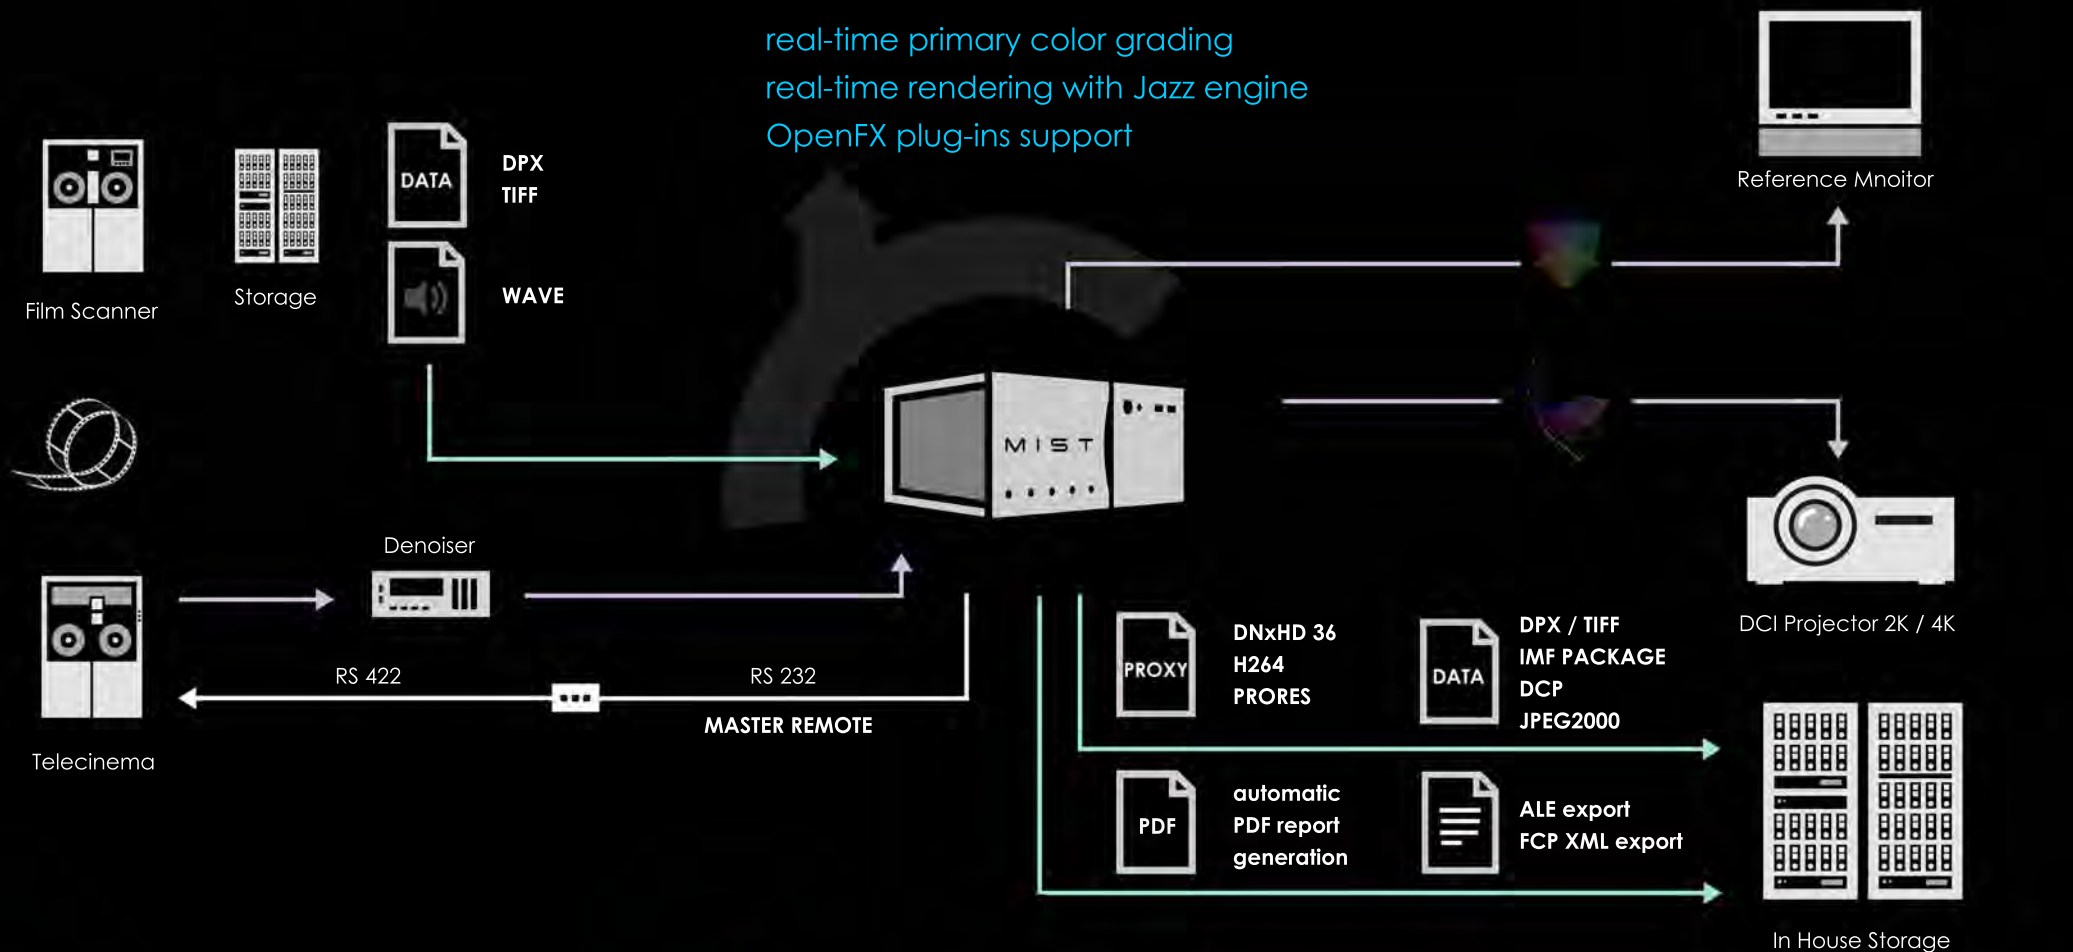

Burn-ins (aspect ratio, time codes, metadata)

Real-time generation of proxies for editing (H264, ProRes, MXF DNxHD...)

→ 3G SDI SD/HD

→ Ethernet / Fiber Channel, USB

MIST FILM DAILIES CREATION & MANAGEMENT

Native ingest of data formats & playback in real-time at original resolution

Ability to mix file formats and resolution in the same timeline

Auto-synchronization of audio tracks with the image layer

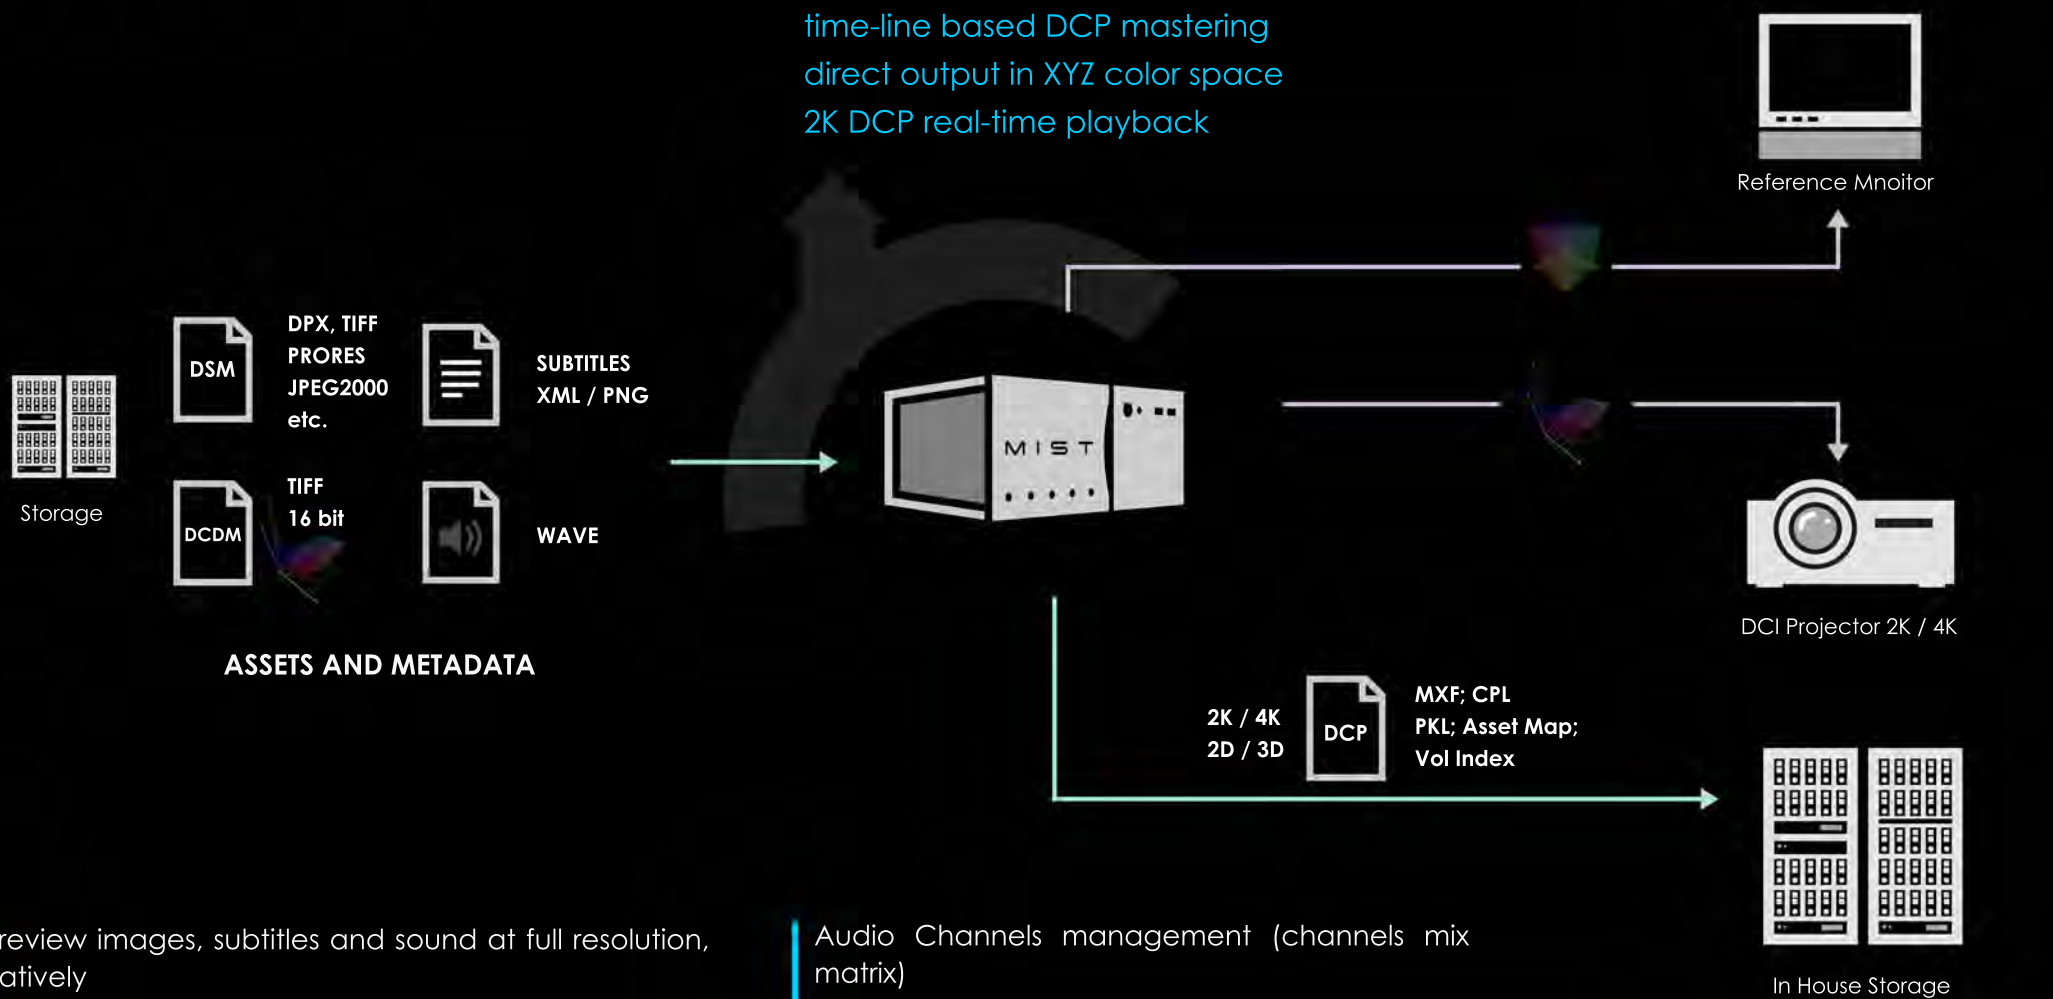

Remote control of Telecine with Sony 9-pin protocol & image capture

Login & Comments per clip handled as metadata

Burn-ins (aspect ratio, time codes, metadata)

Real-time generation of proxies for editing (H264, ProRes, MXF DNxHD...)

MIST DCI MASTERING & DCP CREATION

Preview images, subtitles and sound at full resolution, natively

Perform quick editorial tasks with MIST's editing features (slip, slide, trim)

Easy conforming of mastering clips like rating screen or production visuals

Adjust and place subtitle files in 24 or 25 FPS, and choose between image burn-in or a DCP packaging

Audio Channels management (channels mix matrix)

DCP real-time playback

DCP versioning made easy with the possibility to modify any metadata file or asset (video and audio)

Track essence encryption and Key Delivery Message creation (KDM)

MIST MASTERING FOR BROADCAST

time-line based mastering
resizing, downconversion to HD

Preview images, subtitles and sound at full resolution, natively

Perform quick editorial tasks with MIST's editing features (slip, slide, trim)

Easy conforming of mastering clips like rating screen or production visuals

Audio Channels management (channels mix matrix)

Master versioning made easy with the possibility to modify any metadata file or asset (video and audio)

Adjust and place subtitle files in 24 or 25 FPS, and perform an image burn-in

→ 3G SDI SD/HD

→ Ethernet / Fiber Channel, USB

MIST TELECINE & VTR TRANSFERS (video to data)

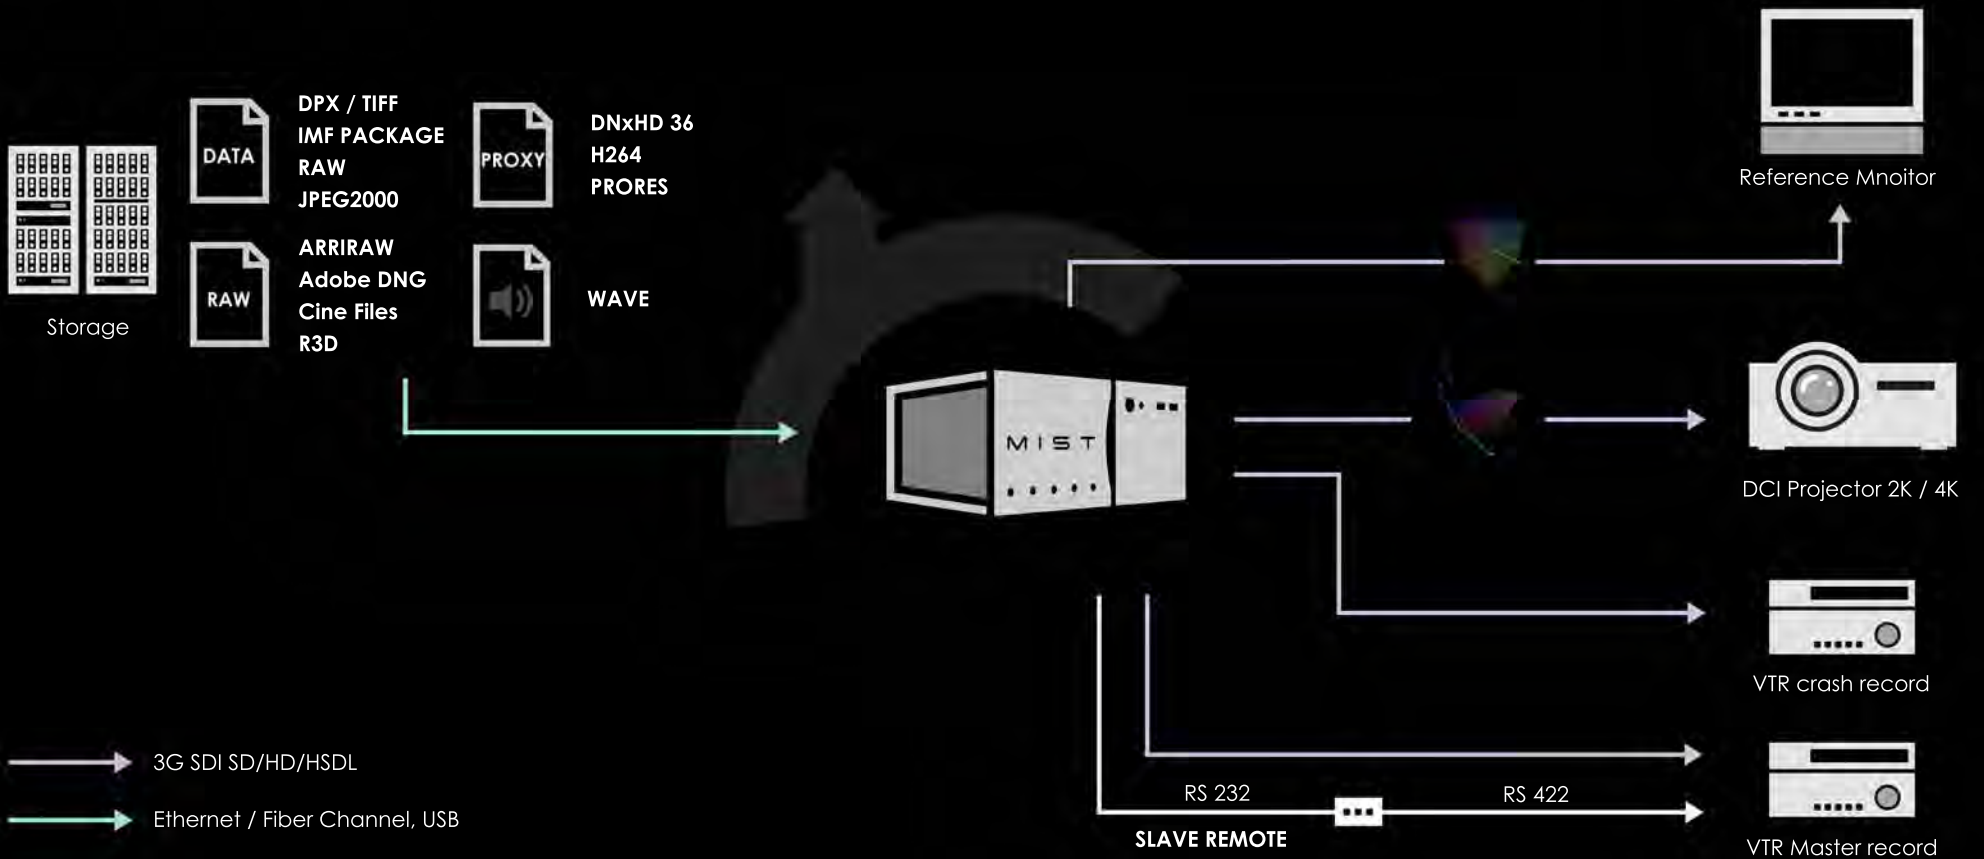

real-time primary color grading
 real-time rendering with Jazz engine
 OpenFX plug-ins support

- Remote control of the Telecine using Sony 9-pin protocol
- Remote control of the VTR using Sony 9-pin protocol
- Image capture in 2K HSDL when supported by the telecine
- Real-time Primary grading and resizing

MIST VTR EMULATION (player)

MIST VTR EMULATION (recorder)

real-time primary color grading
 real-time rendering with Jazz engine
 OpenFX plug-ins support

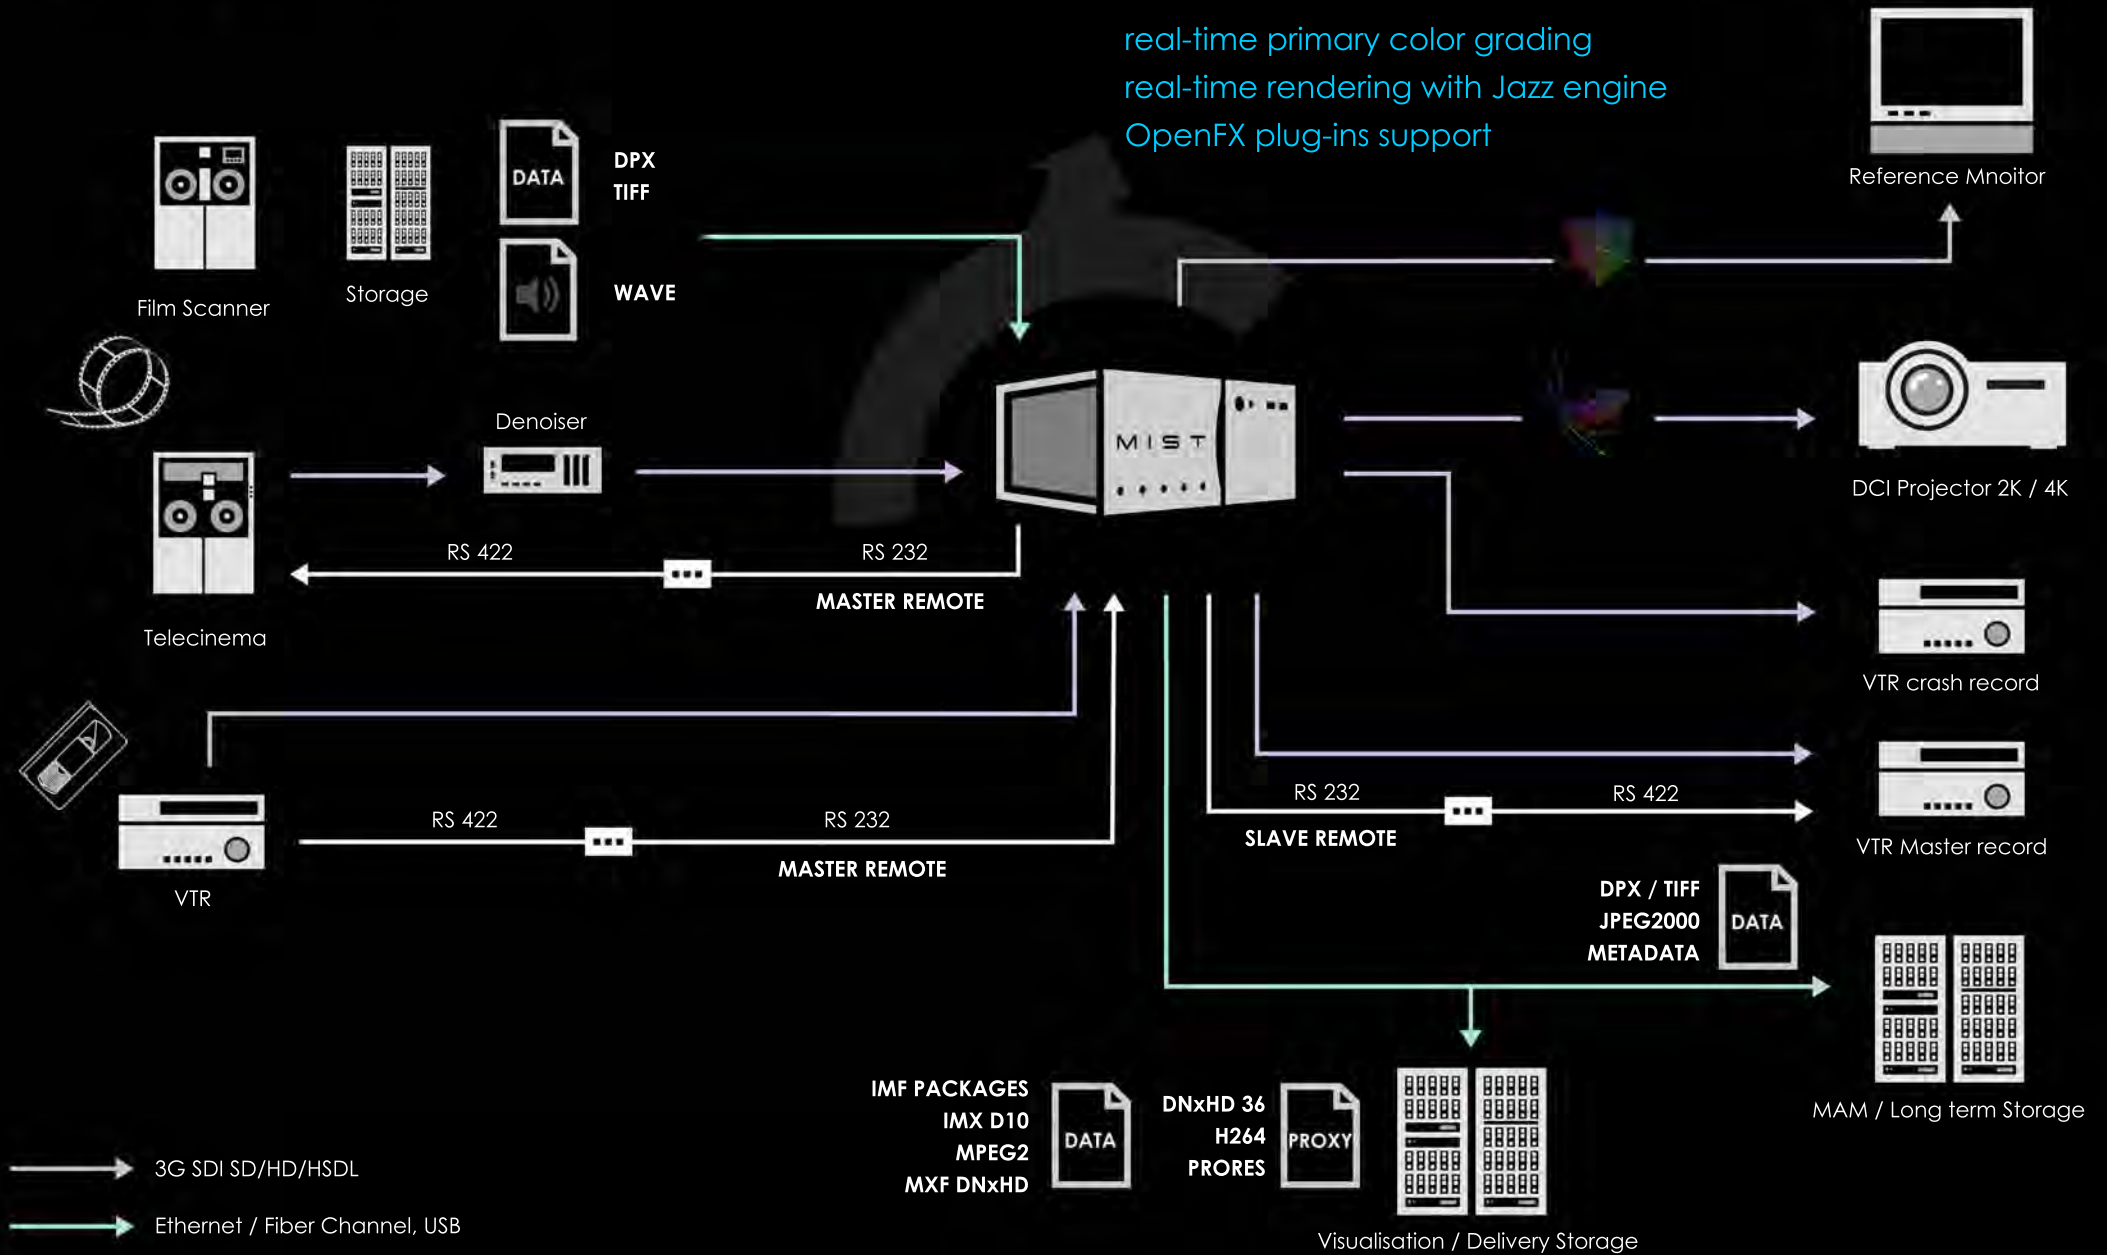

Remote control of the VTR using Sony 9-pin protocol
 IReal-time Primary grading and resizing

→ 3G SDI SD/HD
 → Ethernet / Fiber Channel, USB
